Dear Mrs. Stoetling:

I have mailed your request to examine the files to the Archives of American Art. There are other things in those files, I'm sure. When they assembled them quite some time ago they recorded such things of mine as lecture notes, flash cards used in lectures, exhibition notices, reviews, press notices, some articles I had written, clippings, photo materials, etc. etc. At least they had access to these items - and more. One of the men from the Archives went through most if not all of what I had at the time. So they should have film strips - tapes and all such audio & visual records. They are there to be used for research, as in your case. Please insist! If need be I can send you copies (xerox) of whatever I have. Let me know more later, sincerely, Halabodny →

P.S.

It just occurred to me that you may want
slides of my work - of which I have ample,
photos which are available, news releases,
reviews, magazine articles on or by me. I
might have already sent such material
- but do let me know as specifically as
possible if you think I have things you
could use.
