Dear Vince:

Greetings and good wishes.

Hopefully, we will have a new issue of FIRST WORLD by early April, and hopefully we will be able to publish at least a portion of your very fine article on recent History...

Right now, however, we also have two immediate needs for brief, concise statements on the following:

Paul Robeson, his life, and his impact on and meaning for Black America;

The NAACP's position on Energy, which, in effect, parrots the oil industry's arguments - to the detriment of poor people. Such a statement would fit in our new "National" section called "First Things First".

Whatever your reaction, please do let us hear at once.

Best wishes,

Hoyt W. Fuller
